

RESEARCH STUDY

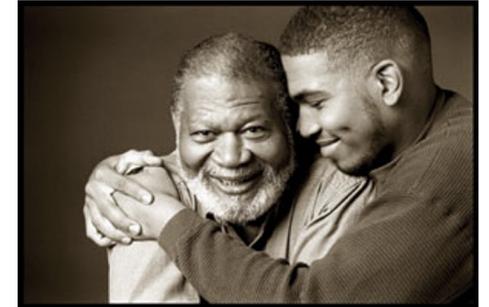

CIRCA: Promoting social connection between people with dementia and caregivers.

Are You Someone Aged 60 or Older and Interested in Technology Development?

Please participate in a focus group to help co-design a new electronic scrapbook for Canadians

What is this study about?

The purpose of this study is to adapt CIRCA to be applicable to a larger Canadian audience. New content will be acquired, evaluated, and customized to various populations, multi-ethnicities, and languages.

datelab@uhn.ca

What is Involved?

Participation in a virtual focus group (with 6-8 people).

Why participate?

To help us improve the development of a tool that can help older adults, including people living with dementia, stay engaged during the time of COVID-19.
